

STONE MOUNTAIN PROPAGATION PROJECT

Stone Mountain Propagation Project (SMPP) is a GNPS propagation site and nursery located inside Stone Mountain Park. The focus at SMPP is to produce plants for habitat restoration as well as a variety of native pollinator plants that are appropriate to the Georgia Piedmont. SMPP hosts weekly workdays where volunteers learn propagation techniques and receive hands-on experience.

BY THE NUMBERS

- **100+ different species** being grown currently.
- Current #1 plant: River Oats (*Chasmanthium latifolium*)
- More than **50 regular volunteers** contributed 825 hours in 2023.
- **29 first time volunteers** have come to SMPP so far in 2024, will you be next?
